

Case Study for Transport & Logistics Industry

Client

On-demand Goods and Asset Monitoring Solutions

Indoors | Outdoors | In-transit

Project Brief:

Roambee is a leading global SCM company. They make IOT hardware known as Bees which are used by fortune 500 companies for the tracking of the shipment. Techify worked with Roambee at multiple level

- Setup of offshore team : Techify took up responsibility to build an Indian IT team for Roambee as part of BOT (Build Operate Transform model). For this we built offshore team of 20 people
- Development of IOT based software for Roambee with hardware integration
- Manage DevOps team and implementation of automation with CICD.
